## PRESS STATEMENT

*For Immediate Release*

July 03, 2022 (EST-USA)

## CELEBRATION OF USA INDEPENDENCE 2022

The Indian Diaspora Council International (**IDC**) and its global affiliates congratulate the people of United States of America (USA) on the 246<sup>th</sup> anniversary of the Declaration of Independence, and convey its best wishes for continuing progress in championing the cause of freedom, justice and liberty throughout the world. We are gratified that America and its institutions remain strong and resilient as a progressive nation, despite recent setbacks due to the devastating effects of Covid-19 and variants, widespread protests to achieve racial, gender and economic inequities, continuing attacks on Asians in America, roll-back of long established women's reproductive rights, worldwide effects of rising costs of food and fuel, and perpetuating misinformation leading to ideological disputes in many segments of American society.

We are grateful for the enormous sacrifices made for the hard fought independence of the USA and the continuing diligence and determination to maintain and advance freedom and liberty which universally endear the USA as a global beacon of hope, freedom and refuge for the persecuted and downtrodden. USA's struggle for independence and promoting freedom worldwide exemplify the indomitable human spirit to choose and make decisions for "the pursuit of life, liberty and happiness", and has inspired nations, racially diverse and ethnic groups and individuals to advance their own struggles for freedom. The USA strives to be introspective and adapt to changing times and recognition of past injustices to better serve the needs of its citizens with established institutions and processes for social justice.

The celebration of USA independence is also of historic significance to the rapidly growing Indian American community who have benefited enormously from the Luce-Celler Immigration Act of 1946 signed into law on 3<sup>rd</sup> July 1946 by President Harry Truman granting naturalization rights to Filipinos and Asian Indians. The Immigration Act of 1946 also "allowed Filipino Americans and Indian Americans to naturalize and become United States citizens". Upon becoming US citizens, the new Americans could own homes and farmland, and petition for family unification. This reversed the Naturalization Act of 1870 which had denied Asians the right to gain US citizenship.

The prominent positions of increasing numbers of persons of Indian origin in the Biden administration, US Congress, state and local elected and appointed positions, academia, business media, medical/legal/science professions, reflect the changing demographics and the diversity of America as well as the rapid strides that Indian Americans are making in every segment of American society, and contributing to America's progress.
